1. Connect the Magnetic Mount Antenna

2. Mount the Magnetic Mount Antenna

3. Connect the PowerConnect+ Adapter and Dock
4 Connect the Audio to Your Vehicle’s Stereo

- If your vehicle’s stereo has an auxiliary input connection, plug the end of the AUX In Cable or Cassette Adapter into the audio input jack. Set the stereo system to play from this auxiliary input source.
- If your vehicle’s FM radio has a built-in cassette player, Cassette Adapters are sold separately. Plug the Cassette Adapter into the AUX In Cable, one end of the cable into the stereo system, and the other end into the Cassette slot.

5 PowerConnect+ Tune your Radio and Vehicle FM Radio to the Same FM Channel

- Stir FM Direct Adapter (FMDA) if none of the above three audio connection options works in your vehicle. The FMDA needs to be installed by a professional installer available FM channel.
- If the selected FM channel doesn’t work well for you, work down the list of FM channels until you find one that allows you to hear Sirius audio.
- Tune your FM radio to an available channel. You should hear Sirius audio through your vehicle’s FM radio.
- When you are satisfied with the sound quality, you’re done! Now sit back and enjoy Satellite Radio.

TIP!

- For convenience, write down or print out the list of available FM channels.
- Go to the website and enter your Zip Code to get a list of FM channels.
- Use the Sirius FM Frequency Finder at www.siriusxm.ca. Enter your Zip Code and the Sirius Direct Adapter will display available channels.
- If your vehicle’s FM radio transmits on the same usable FM channel that you found in step 1, refer to the User Guide again, and set your Transmitter in this mode.
- Your vehicle’s FM radio transmits on the same FM channel as your Sirius receiver. Your vehicle’s FM radio is automatically tuned to the Sirius channel that you have selected on your receiver.
- When you have finished step 4, you’ll first need to find an available FM channel, and then you’ll need to ensure that the Satellite Radio and your vehicle’s FM radio are tuned to the same FM channel.
