Step 1: Install the Home Dock

When installing the Home Dock in your home, choose a location close to your home stereo system or powered speakers, and also where the cable from the Indoor/Outdoor Antenna can reach the Home Dock. The location should be freely accessible and provide good visibility of the display, but should not be located where it will be in direct sunlight, which will affect the visibility of the display screen.

You will need to do some additional preparation to connect your home stereo to your Home Dock. This includes connecting your Home Dock to your home stereo system using the provided Stereo Audio Cable, or directly to powered speakers.

1. Connect the Indoor/Outdoor Antenna

To connect the Indoor/Outdoor Antenna:

- Place the radio into the Home Dock, aligning the connector on the radio with the connector on the Home Dock, and gently press the Radio down until it is fully seated in the Home Dock. Press the power button on the radio to turn it on.

2. Connect the Home Dock to Your Home Stereo System

To connect the Home Dock to your home stereo system:

- Use the stereo's inputs as marked on the Home Dock.
- Connect the 3.5 mm (1/8”) connector from the AUDIO OUT connector at the rear of the Home Dock.
- Take the provided Stereo Audio Cable and connect the single 3.5 mm (1/8”) connector to the AUDIO ANT PWR connector at the rear of the Home Dock.
- Connect the white left and red right Stereo Audio Cables to any available radio stereo connectors to any available audio stereo connectors.
- Connect the white left and red right Stereo Audio Cables to any available radio stereo connectors.
- Connect your stereo's inputs are marked as marked.
- Connect your stereo's inputs are marked.

3. Connect the Home Dock to Your Powered Speakers

To connect the Home Dock to your powered speakers, refer to the next panel.

- Connect the home stereo system using the provided Stereo Audio Cable, or directly to powered speakers.
- Connect the 3.5 mm (1/8”) connector from the Stereo Audio Cable to the AUX IN or LINE IN connector at the rear of the Home Dock. (After completing a few additional steps, we will work on the location of the antenna.)

A. Connect the Indoor/Outdoor Antenna

To connect the Indoor/Outdoor Antenna:

- Connect the Home Power Adapter to the DC5V connector at the rear of the Home Dock, and plug it into a wall outlet.
- Turn the home stereo system down until it is fully seated in the Home Dock. Press the power button on the radio to turn it on.
- Connect the Indoor/Outdoor Antenna's reception can also be tweaked by opening or closing the antenna clamshell, or by moving the antenna around the room or from room to room. Aim it from different windows. In major metropolitan areas, you might find that you get great reception in several locations without worrying too much about antenna aim and placement.

B. Connect the Home Power Adapter

The Home Dock can be connected to your home stereo system through the AUX IN or LINE IN connector at the rear of the Home Dock, and plug it into a wall outlet.

Step 2: Install the Indoor/Outdoor Antenna

To help, its recommended with the antenna to get a bead on the location. While the antenna should be located at the top of the antenna, or at the center of the antenna, it should be located at the center of the antenna.

1. Connect the Home Dock to Your Home Stereo System

To connect the Home Dock to your home stereo system:

- Use the stereo's inputs as marked.
- Connect the 3.5 mm (1/8”) connector from the AUDIO OUT connector at the rear of the Home Dock.
- Take the provided Stereo Audio Cable and connect the single 3.5 mm (1/8”) connector to the AUDIO ANT PWR connector at the rear of the Home Dock.
- Connect the white left and red right Stereo Audio Cables to any available radio stereo connectors to any available audio stereo connectors.
- Connect the white left and red right Stereo Audio Cables to any available radio stereo connectors.
- Connect your stereo's inputs are marked.
- Connect your stereo's inputs are marked.

2. Connect the Home Dock to Your Home Stereo System

To connect the Home Dock to your home stereo system:

- Use the stereo's inputs as marked.
- Connect the 3.5 mm (1/8”) connector from the AUDIO OUT connector at the rear of the Home Dock.
- Take the provided Stereo Audio Cable and connect the single 3.5 mm (1/8”) connector to the AUDIO ANT PWR connector at the rear of the Home Dock.
- Connect the white left and right Stereo Audio Cables to any available radio stereo connectors to any available audio stereo connectors.
- Connect the white left and right Stereo Audio Cables to any available radio stereo connectors.
- Connect your stereo's inputs are marked.
- Connect your stereo's inputs are marked.

3. Check Your Radio

When the radio is in the Home Dock, aligning the connector on the radio with the connector on the Home Dock, and make sure the Radio is fully seated in the Home Dock. Press the power button on the radio to turn it on.

4. Connect Your Home Antenna

The Home Dock can be connected to your home stereo system, or as a part of your system. If you are connecting to a home stereo system, use the following section. If you are connecting to a pair of powered speakers, refer to the next panel.

To connect the Home Dock to Your Home Antenna:

- The Home Dock can be connected to your home stereo system through the AUX IN or LINE IN connector at the rear of the Home Dock, and plug it into a wall outlet.
- Connect the Indoor/Outdoor Antenna's reception can also be tweaked by opening or closing the antenna clamshell, or by moving the antenna around the room or from room to room. Aim it from different windows. In major metropolitan areas, you might find that you get great reception in several locations without worrying too much about antenna aim and placement.

A. Connect the Indoor/Outdoor Antenna

To connect the Indoor/Outdoor Antenna:

- Place the radio into the Home Dock, aligning the connector on the radio with the connector on the Home Dock, and gently press the Radio down until it is fully seated in the Home Dock. Press the power button on the radio to turn it on.

1. Turn the Home Dock

The Home Dock can be connected to your home stereo system through the AUX IN or LINE IN connector at the rear of the Home Dock, and plug it into a wall outlet.

1. Connect the Home Dock to Your Home Stereo System

To connect the Home Dock to your home stereo system:

- Use the stereo's inputs as marked.
- Connect the 3.5 mm (1/8”) connector from the AUDIO OUT connector at the rear of the Home Dock.
- Take the provided Stereo Audio Cable and connect the single 3.5 mm (1/8”) connector to the AUDIO ANT PWR connector at the rear of the Home Dock.
- Connect the white left and right Stereo Audio Cables to any available radio stereo connectors to any available audio stereo connectors.
- Connect the white left and right Stereo Audio Cables to any available radio stereo connectors.
- Connect your stereo's inputs are marked.
- Connect your stereo's inputs are marked.

Step 3: Activate

The Home Dock is your Sirius XM audio interface and requires a Sirius subscription box. Before you can start listening, please do the following:

- Make sure your Stratus 6 is properly installed and operating on the Sirius network so that you can hear the audio on channel 1.
- Make a note of your Sirius ID (SID). You can find it on channel 0, on a label on the bottom of the gift box, and on the label on the back of your Stratus 6.
- Activate your service.

Start by signing up for the Sirius service by calling 1-877-438-9677 or go to siriusxm.ca/activate.

When you're ready to activate, your Stratus 6 will monitor all channels that you have subscribed to. At this time, if you're activity on channel 1 will occur.

1. Make a note of your Sirius ID (SID). You can find it on channel 0, on a label on the bottom of the gift box, and on the label on the back of your Stratus 6.

2. Activate your service.

- Online: Go to siriusxm.ca/activate
- By phone: Call 1-877-438-9677

*Note: You must be within 100 miles of a Sirius satellite to activate.

Once your Stratus 6 is activated, you can change channels, access your programming, and change your settings in the Settings menu. You can also access the User Guide and Terrestrial signal strength, you're done. If not, try some of the other Indoor/Outdoor Antenna Installation Suggestions.

Signal Indicator

Refer to your radio's User Guide for instructions, and access the User Guide through the main menu, or on an online mapping Web site that offers satellite views of street addresses where you can easily

- Click your radio to the website.

Still not sure which way is south or where to place your Home Antenna? Look up your location on an online mapping Web site that offers satellite views of street addresses where you can easily

- Click your radio to the website.

Step 3: Activate

4. Copy Signal Strength

Inconsistent, try moving the Indoor/Outdoor Antenna around the room or from room to room. Aim it from different windows. In major metropolitan areas, you might find that you get great reception in several locations without worrying too much about antenna aim and placement.

B. Connect the Indoor/Outdoor Antenna

The Indoor/Outdoor Antenna's reception can also be tweaked by opening or closing the antenna clamshell, or by moving the antenna around the room or from room to room. Aim it from different windows. In major metropolitan areas, you might find that you get great reception in several locations without worrying too much about antenna aim and placement.

Another method is to start at any window, then work from window to window in a simple pattern to find the window gives the best signal strength. Note that the antenna must also have an unobstructed view of the sky.

- Click your radio to the website.

Quick Start Guide

Stratus 6 Radio & Home Kit

What’s in the Box?

a. Stratus 6 Front Panel
b. Home Dock
c. Home Power Adapter
d. Stereo Audio Cable
e. Indoor/Outdoor Home Antenna
f. Remote Control

The following section describes the Stratus 6’s buttons and controls.

1. Power Button: Turns the Stratus 6’s power ON and OFF.
2. FM Presets/Menu Button: Selects between different preset frequencies used by the built-in wireless FM Transmitter. Press and hold to access Menu Options to make setup and feature changes.
3. Jump Button: Jumps to a pre-selected channel.
4. Preset/Direct Tune Buttons (10 – 9): Sets and selects preset channels. Also lets you directly access channel numbers by entering the channel numbers.
5. Category < > Buttons: Navigates through the Category List screen which displays channel categories.
6. LCD Display: Displays information about the Stratus 6’s operation and about the program that is playing.
7. Channel Up/Down Buttons: Navigates through channels and display screens.
8. Select Button: Selects items highlighted on the display screen. When at the Default display screen, a press-and-release will display a prompt to enter a channel number.

Canadian Compliance

This Class B digital apparatus complies with Canadian ICES-003.

IC STATEMENT

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. The product is not available in the Canada market, only channel 1~11 can be operated. Selection of other channels is not possible. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p) is not more than that permitted for successful communication. The Radiation Exposure Statement: This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment.
