**Connect to a Wireless Network Using the Network Wizard**

The Network Wizard feature makes it easy to connect to a wireless network. It searches for available wireless networks and displays a list of wireless networks found. You simply select yours, enter a key (password) if your wireless network is security enabled, and the radio connects to your wireless network.

To Connect to a Wireless Network:

1. Plug the radio into an AC outlet.
2. Turn your SIRIUS TTR1 Internet Radio on by pressing the Power button.
3. The Main Display Screen will be displayed. Press the Category Tune button.
4. Select All channels.
5. When the library is loaded, you’ll be shown the main display screen and you should hear the audio playing.
6. When the channel is loaded, you’ll be shown the main display screen.
7. Press the Category Tune button.
8. Select the channel(s) you want to listen to.
9. Press the OK button.
10. Your SIRIUS TTR1 Internet Radio will tune to your selected channel(s).

**Connect to a Wired Network Using the Network Wizard**

To connect to your network using a wired connection:

1. Connect the Ethernet cable to your wired network.
2. Connect the other end of the Ethernet cable to your SIRIUS TTR1 Internet Radio.
3. The radio will attempt to connect to the SIRIUS Internet Radio service.
4. When successfully connected, the Default Channels screen will be displayed. You’ll have to reenter the correct user name and password.
5. When you have successfully connected to the SIRIUS Internet Radio service, the Category Tune screen will be displayed. Press the TUNE knob to select All channels.
6. In the All channels screen, turn the TUNE knob to scroll through all of your channel choices. Highlight the channel you want to listen to.
What's in the Box?
