

**Warning:**

- When using this product, it is always important to keep your eyes on the road and hands on the wheel. Not doing so could result in personal injury, death, and/or damage to your Xpress® Receiver, accessories, and/or to your vehicle or other property.
- Xpress® should be placed in your vehicle where it will not interfere with the function of safety features, e.g., deployment of airbags. Failure to correctly place Xpress® may result in injury to you or others if the unit becomes detached during an accident and/or obstructs the deployment of the airbag.

What’s in the Box?

- Xpress®
- Remote Control
- Car Cradle
- Car Power Adapter
- XM SureConnect:

  - FM Direct Adapter
- Car Mount Preparation Kit
- Swivel Mount
- Vent Mount
- Car Power Adapter
- XM SureConnect:
  - Cassette Adapter
  - FM Direct Adapter

**Xpress® Functions**

- **Front Panel**:
  - Antenna
  - Audio Input
  - Volume
  - Power Button

- **Menu**:
  - Search for channels by category.
  - Displays all your favorite presets.
  - Displays current channel and configuration options.
  - Press center button to select.

- **Navigation Knob**
  - Rotate to change the volume level.
  - Switches between menu items.

**Vehicle Installation**

**Step 1: Mounting the XM Antenna**

Mount the XM antenna to the roof or trunk of the vehicle. During installation, make sure you are outside and the antenna is not obstructed by tall buildings. For best results mount the XM antenna to the outside of your vehicle. Below are the recommended options.

**Step 2: Installing the Vent Mount or Swivel Mount**

Installing the vent mount:

1. Clear the mounting surfaces with the surface preparation kit.
2. Peel away the adhesive liner and firmly press the swivel mount to the surface for 30 seconds. Allow 24 hours before using the mount.

Installing the swivel mount:

1. Clear the mounting surfaces with the surface preparation kit.
2. Peel away the adhesive liner and firmly press the swivel mount to the surface for 30 seconds. Allow 24 hours before using the mount.

**Step 3: How to receive XM through your car stereo**

There are several methods of receiving XM through your car stereo:

- **Cassette Adapter**
- **FM Direct Adapter**

**Professional Installation**

- Use a professional installation if you choose to use this method of installation.

**Audio Input**

- Some vehicles come with an audio input jack. If your vehicle has this type of input you can simply use a mini audio cable (sold separately).
Basic Controls

Turn on your Xpress. Subscribe to XM if you haven’t done so already.

Selecting Channels

Resume key to scroll through the list of channels. Press the XM button to select that channel. You can also use up/down arrows so that you do not have to press the XM button to select a channel. See “Direct Tune” in your user guide.

- OR -
Press the number keys on your Xpress or the remote that corresponds to the channel number.

- OR -
If you have channels assigned to presets, press a number key and Xpress will tune to the channel assigned to that number.

Direct Entry

1. Press the FM button until the word ”Direct” appears in the display.

2. Press the number keys corresponding to the channel number, for example, channel 31, press 3, 1.

3. Press the “p/d” button to select that channel. You can also select a channel by pressing the “p/d” button until the appropriate “Preset” bank (Preset A, B, or C) appears in the display.

Display

Press the display button to change the way you view the content on display. There are four different display modes:

- Display mode 1 (single channel large font)
- Display mode 2 (single channel)

Navigating Replay

1. Press the  button. If a track has been playing for less than 5 seconds, Xpress rewinds the beginning of the previous track. If the track has been playing for longer than 5 seconds, Xpress rewinds to the beginning of the current track. Upon entering the replay buffer, Xpress will display “Display” on the display.

2. Pressing the  button again skips backward to previous track in the order they played. Xpress allows you access up to 30 minutes of previously listened to live broadcast. Press and hold for 3 seconds to stop at the beginning of your replay list.

3. Press the  button to go forward in the track list.

4. To exit 30-Minute Replay and return to the live XM broadcast, press hold the  button for 3 seconds, Xpress will display “LIVE” on the display.

30-Minute Display

1. Press the  button. The previous 30 minutes of your currently tuned channel will be displayed.

2. Press the  button again to get back to the time of the last track played.

3. To resume playback from when you had paused, press the  button again.

4. To return to the live XM broadcast, press and hold the  button until Xpress leaves and displays “LIVE” on the screen.

Using Presets

There are 30 presets in all (eight bank A, B, and C hold 10 presets. Press the “p/d” button to select the proper bank. Use these banks to program your favorite channels or to create separate preset banks for additional users to enjoy. To set a channel to a preset:

1. Tune to the desired channel.

2. Press the gold button until the appropriate “Preset” bank (Presets A, B, or C) appears in the display.

3. Press and hold the number key that corresponds to the preset you would like to set. Xpress will tune when the channel is stored.

To select a stored preset:

1. Press the gold button until the appropriate “Preset” bank (Presets A, B, or C) appears in the display.

2. Press one of the number keys. Xpress will tune to that channel.

Manu Options

When your Xpress is in the car caddy (and using either SureConnect or XM Direct accessory to transmit audio), and you press Menu, your display will look like this:

- Display mode 1 (single channel large font)
- Display mode 2 (single channel)

Note: pressing the Menu or toggling the knobs left, allows you to back out of any menu.

For more information on Menu Options, please refer to your Xpress user guide.

IC & FCC Statement

Please note that the power cable that has been supplied with your device is supplied with permanently attached ferrite beads. It is the responsibility of the user to use the power cable with the ferrite beads.

The user is cautioned that changes or modifications not expressly approved by XM Satellite Radio Inc. can void the user’s authority to operate the device.

This device has been designed to operate with the antenna provided in the original packaging. Use of antenna other than the antenna provided will result in improper operation, and is strictly prohibited under regulations of Industry Canada.

Operation is subject to the following two conditions:

1. (1) This device may not cause harmful interference.

2. (2) This device must accept any interference received, including interference that may cause undesired operation.

The equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the installation instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna of the affected receiver.
- Increase the separation between the XM equipment and the affected receiver.
- Connect the XM equipment into an outlet on a circuit different from that to which the affected receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: the FCC and FAA have not certified this Satellite Radio Receiver for use in any aircraft (neither portable nor permanent installation). Therefore, XM Satellite Radio cannot support the type of application or installation.
