Introduction

Features

Congratulations on the purchase of your Home Kit!

The Home Kit lets you enjoy your favourite SiriusXM programming through your home audio system.

Safety and Care Information

**IMPORTANT!** Always read and understand all the instructions to avoid injury to yourself and/or damage to your device. Sirius XM Canada Inc. disclaims all responsibility for damage from data loss due to breakdown, repair, or other causes.

- Do not expose to extreme temperatures (above 60°C or below -20°C, or above 140°F or below -4°F).
- Do not expose to moisture. Do not use device near or in water. Do not touch the device with wet hands.
- Do not let any foreign matter spill into device.
- Do not store in dusty areas.
- Do not expose to chemicals such as benzene and thinners. Do not use liquid or aerosol cleaners. Clean with a soft damp cloth only.
- Do not expose to direct sunlight for a prolonged period of time, and do not expose to fire, flame, or other heat sources.
- Do not try to disassemble and/or repair device yourself.
- Do not drop your device or subject it to severe impact.
- Do not place heavy objects on device.
- Do not subject device to excessive pressure.

**WARNING!**

- Opening the case may result in electric shock.
- Make sure that you insert the Home Power Adapter’s plug all the way into the outlet.
What's in the Box?

- Home Dock
- Indoor/Outdoor Antenna
- Home Power Adapter
- Stereo Audio Cable

**TIP!** If you prefer to use a Remote Control, and you want to add one to your Home Kit, visit siriusxm.ca or your favourite retailer.
Home Dock

Connections

Rear View

- **AUDIO OUT**: Connection for home stereo system or powered speakers.
- **ANT IN**: Connection for the Indoor/Outdoor Antenna.
- **DC IN**: Connection for Home Power Adapter.
There are two parts to setting up your Home Kit. First, connecting the Home Dock to your stereo or powered speakers, then placing and aiming the Home Antenna. Let’s start with getting your Home Dock set up.

**Step 1: Connect the Home Dock**

When installing the Home Dock in your home, choose a location in close proximity to your home stereo system or powered speakers, and also where the cable from the Indoor/Outdoor Antenna can reach the Home Dock. The location should be easily accessible and provide good visibility of the display, but should not be located where it will be in direct sunlight, which will affect the visibility of the display screen.

You will also need to decide whether you will be connecting your Home Dock to your home stereo system using the provided Stereo Audio Cable, or directly to powered speakers.

**Connect the Indoor/Outdoor Antenna**

Once you have selected a location, connect the antenna to the ANT IN connector at the rear of the Home Dock. (After completing a few additional steps, we will work on the location of the antenna.)
Connect the Home Power Adapter

Connect the Home Power Adapter to the **DC IN** connector at the rear of the Home Dock, and plug it into a wall outlet.

![Connect the Home Power Adapter](image)

Connect the Home Dock to a Home Stereo System or Powered Speakers

The Home Dock can be connected to your home stereo system, or to a pair of powered speakers. If you are connecting to a home stereo system, see the following section. If you are connecting to a pair of powered speakers, see "To Connect the Home Dock to Your Powered Speakers" on page 15.

**To Connect the Home Dock to Your Home Stereo System**

The Home Dock can be connected to your home stereo system through the AUX IN or LINE IN connection of your home stereo system, using the provided Stereo Audio Cable.
1. Take the provided Stereo Audio Cable and connect the single 3.5 mm (1/8”) connector to the **AUDIO OUT** connector at the rear of the Home Dock.

2. Connect the white left and red right Stereo Audio Cable connectors ("L" and "R" are also on each respective tip) to any available input other than PHONO on your home stereo system. (If your stereo’s inputs are marked red and black, simply connect the white plug to the black input.)

3. Turn the home stereo system On, and make sure you select the correct input on your stereo system for the **AUX In** or **LINE In** connection.
To Connect the Home Dock to Your Powered Speakers

The Home Dock can be connected directly to a pair of powered speakers.

1. Connect the 3.5 mm (1/8””) connector from the powered speakers to the AUDIO OUT connector at the rear of the Home Dock.

   ![Diagram of Home Dock and speakers connection]

2. Plug the powered speakers into an AC outlet.
3. Turn On the powered speakers.

Dock Your Radio

Place your radio into the Home Dock as shown, and turn the radio On by pressing the Power button.

![Diagram of radio being docked]
Step 2: Install the Indoor/Outdoor Antenna

To begin, try experimenting with the Home Antenna to get a feel for the reception in your location. Move the antenna around the room or from room to room. Aim it from different windows. In major metropolitan areas, you might find that you get great reception in several locations without worrying too much about aim and placement.

Refer to your radio’s User Guide for instructions, and access the **Signal** or **Signal Indicator** screen of your radio to see a visual indication of signal strength. If you’re receiving a good Satellite and Terrestrial signal strength, you’re done. If not, try some of the suggestions which follow.

Other Indoor/Outdoor Antenna Installation Suggestions

If you find you are getting a signal, but it’s inconsistent, try moving the Indoor/Outdoor Antenna closer to a window, ideally one that is facing due south.

Not sure which way is south? Think about where the sun rises (in the east) and sets (in the west). Then stand so that east is to your left and you’ll be facing south. Is there a
window in the direction you’re facing? Move the antenna closer to the window.

**TIP!** Still not sure which way is south or where to place your Home Antenna? Look up your location on an online mapping Web site that offers satellite views of street addresses where you can easily see which way is south, and what window may offer an unobstructed view of the sky.

Another easy method is to start at any window, then work from window to window in a simple pattern to find the window gives the best signal strength. Note that the antenna must also have an unobstructed view. No trees or buildings blocking its aim. If the antenna is aimed through a window, be aware that blinds, screens, or any other non-glass elements such as thermal insulation can sometimes cause reception issues. If this is the case, you may want to use another window or place the antenna outside of the window.

If you find a window that gives you good signal strength, you can place the antenna on the windowsill. The antenna may need to be placed on something to raise it above the level of the window frame.

If you don’t have a window where you receive a consistent signal, or placing the antenna in a window is not a practical solution for you, **BETTER** reception can be achieved by placing the antenna outside on a window ledge, porch, table, or patio. The location you choose should provide the antenna with a clear view of the southern sky.

If none of the previous solutions work for you, then the **BEST** reception can be achieved by mounting the antenna outdoors, with a clear view of the southern sky.
Note that you will want to consider any potential hazards when you choose the mounting location, and possibly consider professional installation. Sirius XM Canada Inc. is not liable for any damages.

To mount the antenna, you will need four screws (not included) with a 1/4” head (e.g., an M3 screw), and that are suitable for the material onto which you are affixing the antenna, (e.g., wood, metal, etc.). The screws should be spaced 35 mm (1-3/8”) apart horizontally and 30 mm (1-1/8”) vertically. Refer to the template on "Indoor/Outdoor Antenna Template" on page 30.
Once you have found a suitable location for the antenna, route the antenna cable to the Home Dock. Be sure you avoid any obstructions that could crimp, kink, or twist the cable. Use protective grommets wherever rough openings are encountered. If the antenna is installed outdoors, route the cable from the antenna location to the interior of the home, working the cable through the basement, under a window sill, etc., and make adjustments to take up cable slack as necessary.

**TIP!** If your Indoor/Outdoor Antenna's cable isn’t long enough, visit siriusxm.ca, or your favourite retailer, and consider a 15 m (50 ft.) Indoor/Outdoor Antenna Extension Cable or a Wireless Home Signal Repeater.

If the signal is good for either Satellite or Terrestrial (or both), and you are hearing the audio from the radio, the installation is complete.

If the signal reception is low, or intermittent, try another location for the antenna. Verify that the antenna is pointed south, and that the antenna’s view of the sky is not blocked by a tree, a building, a bridge, or anything else. Adjust until you are receiving a good signal.

The Indoor/Outdoor Antenna’s reception can also be tweaked by opening or closing the antenna clamshell, and turning the antenna. While observing the signal strength, make small adjustments to the angle of tilt of the clamshell until the highest possible signal strength is achieved. If you have not wall-mounted the antenna, turn the antenna slightly to the right or left and observe if the
signal strength increases. For each tweak, allow a few seconds in each position to determine if the signal strength increases.

If the signal reception is good, but there is no audio, verify your audio connection.

- If you are connected to a home stereo system, be sure the system is set to the auxiliary input source, and you have connected the Stereo Audio Cable to the auxiliary input connectors.
- If you are connected to powered speakers, be sure the speakers are plugged into an outlet, and are turned On.

The audio level of your radio can also be increased. Refer to the User Guide which accompanied your radio and increase the audio level.

If you still have questions, for example, ‘Are there any other options/things I should consider?’, etc., refer to "Troubleshooting" on page 22.
Your Home Kit has been designed and built to be trouble-free, but if you experience a problem, try this:

- Check that all connections are firm and secure.
- Make sure you have connected the Home Dock as described in this User Guide. Verify that the AC power outlet is working.

| Acquiring Signal                    | • Move the antenna to a south-facing window. Not sure which way is south? Think about where the sun rises (in the east) and sets (in the west). Then stand so that east is to your left and you’ll be facing south. Is there a window in the direction you’re facing?  
• You may need to find a better location for the antenna. Refer to "Step 2: Install the Indoor/Outdoor Antenna" on page 16. |
| Check Antenna                       | • Make sure that the Indoor/Outdoor Antenna cable is firmly and securely plugged into the Home Dock. Make sure the cable is not bent or broken.  
• Turn the radio off, then on, to reset this message. |
<p>| Channel Off Air                      | • The channel you’ve selected is not currently broadcasting. Tune to another channel. |
| Loading                              | • Your radio is acquiring audio or program information. This message usually goes away in a few seconds. |</p>
<table>
<thead>
<tr>
<th>If you see this on the screen:</th>
<th>Try this:</th>
</tr>
</thead>
</table>
| Updating                      | • Your radio is being updated with the latest encryption code. Wait until the update is done.  
• You may be trying to tune to a channel that is blocked or unavailable. Tune to another channel. |
|                               | • No program information, such as artist name, song title, or channel exists. |
| If this happens:              |                |
| You do not receive all the channels to which you subscribed | • If you have not yet activated your service, refer to the Activation section in the User Guide which accompanied your radio. |
| No audio                      | • Check all cables between your radio and your home stereo system or powered speakers for a firm and secure connection.  
• Ensure you have selected the proper input source on your home stereo system.  
• Increase the audio level of the radio. Refer to the User Guide which accompanied your radio for instructions. |
| Audio sounds too soft         | • Raise the volume of your home stereo system or powered speakers, or increase the audio level of your radio until the sound quality improves. Refer to the User Guide which accompanied your radio for instructions. |

Patent Information

It is prohibited to, and you agree that you will not, copy, decompile, disassemble, reverse engineer, hack, manipulate, or otherwise access and/or make available any technology incorporated in this product. The music, talk, news, entertainment, data, and other content on the Services are protected by copyright and other intellectual property laws and all ownership rights remain with the respective content and data service providers. You are prohibited from any export of the content and/or data (or derivative thereof) except in compliance with applicable export laws, rules and regulations. The user of this or any other software contained in an XM radio is explicitly prohibited from attempting to copy, decompile, reverse engineer, hack, manipulate or disassemble the object code, or in any other way convert the object code into human-readable form.

Environmental Information

Follow local guidelines for waste disposal when discarding packaging and electronic appliances.

Your Home Kit is packaged with cardboard, polyethylene, etc., and does not contain any unnecessary materials.
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. For product available in the Canada market, only channel 1~11 can be operated. Selection of other channels is not possible. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p) is not more than that permitted for successful communication. IC Radiation Exposure Statement: This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

WARNING! The FCC and FAA have not certified this Satellite Radio Receiver for use in any aircraft (neither portable nor permanent installation). Therefore, SiriusXM cannot support this type of application or installation.
