1. Installing the Radio Dock Adapter for Your Radio

a. Select the Dock Adapter for your Radio by referring to “What’s in the Box?” on the opposite side to identify the adapter, or turn the adapters over and locate the name imprinted on the underside of the adapter.

b. Install the Radio Dock Adapter for your Radio into the Universal Boombox as shown. Align the Radio Dock Adapter in the Universal Boombox and gently press it until it snaps into place.

c. To remove the Radio Dock Adapter, remember that the Radio Dock Adapters are constructed from precision molded plastic. During removal, extra care must be taken to not bend, force, or otherwise stress the adapter, or break off the tabs that hold the adapter in the Universal Boombox. Remove the Radio Dock Adapter from the Universal Boombox by placing a coin, or your fingernail, into the slot at the back of the adapter and pulling it up straight up, as shown.

2. Installing the Batteries or Home Power Adapter

The Universal Boombox can operate on either batteries (8 “D” cells) or by using the Home Power Adapter.

a. Select the Dock Adapter for your Radio by referring to “What’s in the Box?” on the opposite side to identify the adapter, or turn the adapters over and locate the name imprinted on the underside of the adapter:
   - Sirius: Adapter 1 for all Sirius Radios.
   - XM: Adapter 2 for all XM Radios.

b. Insert the Radio Dock Adapter for your Radio into the Universal Boombox as shown. Align the Radio Dock Adapter in the Universal Boombox and gently press it until it snaps into place.

3. Installing the Indoor/Outdoor Home Antenna

a. Plug the antenna cable into the ANTENNA connector at the rear of the Universal Boombox. Align the mounting holes on the bottom of the antenna with the 4 brackets on the rear of the Universal Boombox, then slide the antenna over the mounting brackets and then slide the antenna down slightly to secure it in place.

b. Open the antenna clamshell so that the top of the antenna is facing the sky.

4. Insert Radio and Turn On the Universal Boombox

a. Be sure the Universal Boombox is powered off.

b. Align the Radio with the Radio Dock Adapter.

c. When aligned, gently press the radio down so that it slides down the Radio Dock Adapter and into the connector, until it is fully seated in the Universal Boombox.

d. Press the Power/Volume knob at the front of the Universal Boombox until the Power On light is on.

TIP! If your Radio has an Audio Level or Line Out Level adjustment feature in the Settings menu when it’s docked in the Universal Boombox, you should set this level to the minimum that does not cause distorted sound. This will maximize the audio quality. Refer to the User Guide which accompanied your Radio for instructions on how to set the level. Some Radios do not have this adjustment available when docked in the Universal Boombox. These Radios set their level automatically to optimize the sound quality. No adjustment is necessary. The installation is complete. Sit back and enjoy your favorite programming on SiriusXM Radio!
Universal Boombox Controls and Connections

1. Power and Volume Knob: Pressing the knob turns the Universal Boombox’s power on or off. Turning the knob increases or decreases the volume level (+/—).
2. AUX In Connector: Input connection for audio from an external device, such as an iPod, phone, or tablet.
3. Source Switch: Selects audio input from Radio, AUX or Memory source.
5. Power and Volume Knob: Pressing the knob turns the Universal Boombox’s power on or off. Turning the knob increases or decreases the volume level (+/—).
