Let's Get Started

1. Attach all connections firmly and securely.

2. Professional Wired FM
   - Connect the XM cable to your audio system that is connected to your RoadyXT.
   - Most users should NOT need to change this level from the factory setting.
   - Increase audio output level (see page 18).

3. Self Install (XM SureConnect)
   - Insert the XM receiver: 5 V, 2000 mA maximum current, positive polarity
   - 5.7 cm (H) x 9.4 cm (W) x 1.8 cm (D)
   - Exclusive programming on XM includes Major League Baseball® games for the 2004 season.

4. Making your vehicle's FM radio an XM radio
   - A built-in FM modulator allows you to hear XM programming on your vehicle's FM radio, using any unused frequency on the FM band.
   - If your vehicle's radio does not have a removable end cap, then it is equipped with an internal-FM modulator or the use of the cassette adapter.

5. Using presets
   - You can store up to 16 presets.
   - To store a channel, press and hold the preset button.
   - Use the arrow buttons to find channel 0, then push the "menu" button and choose the "Select" option.
   - You should see an 8-character XM Radio ID in the display. (The XM Radio ID should also be on the bottom of your RoadyXT, and on the package.) Write the ID here:

Warning: When using this product it is always important to keep all safety and operating instructions in this manual.
Please note that the power cable that has been supplied with your device is supplied with permanently attached ferrite beads. It is the responsibility of the user to use the power cable with the ferrite beads.

The user is cautioned that changes or modifications not expressly approved by XM Satellite Radio Inc. can void the user’s authority to operate this device.

This device has been designed to operate with the antenna provided in the original packaging. Use of antenna other than the antenna provided will result in improper operation, and is strictly prohibited per regulations of Industry Canada. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the installation instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna of the affected receiver.
- Increase the separation between the XM equipment and the affected receiver.
- Connect the XM equipment into an outlet on a circuit different from that to which the affected receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: The FCC and FAA have not certified the Delphi XM RoadyXT Satellite Radio Receiver for use in any aircraft (neither portable nor permanent installation). Therefore, Delphi cannot support this type of application or installation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.
Let’s Get Started

2. Ensure the cigarette lighter adapter or auxiliary power socket is clean and
3. Select “On.” To return to the factory default, select “Off.”

Changing display information

Normally as you press the arrow buttons, you can preview what’s playing on
the “menu” button to confirm.

Changing display information

Select a channel without having to press the “menu” button (step 2) tunes you to the first channel of
your RoadyXT.

Display

You can easily adapt your RoadyXT to suit your listening habits. Simply press
the “menu” button several times (or simply wait a few seconds) until your
display shows artist name, song title, Stock
Ticker, and connectors are not damaged or kinked.

Recovering from a malfunction

Failure to properly follow all installation
instructions will not occur in a particular installation. If this equipment does cause harmful interference to radio or television rece
system that is connected to your RoadyXT.

A Brief History

- Dock your RoadyXT into cradles that are easily installed in your vehicles or your home. One simple motion connects your RoadyXT’s power, audio, and antenna.

- A built-in FM modulator allows you to hear XM programming on your vehicle’s FM radio, using any unused frequency on the FM band.

- Exclusive Info Extras and Stock Ticker bring you personalized stock information, sports scores, and more.

- TuneSelect alerts you when your favorite song is being played on any XM channel.
About Delphi

Delphi is a worldwide leader in mobile electronics, vehicle components, and audio technology. Delphi created the first in-dash car radio in 1936 and continues its strong tradition of innovation in the audio industry. Now Delphi technology has helped make satellite radio a reality, and Delphi continues to expand its in-vehicle and consumer electronics technologies. With its exciting line of satellite radio products, Delphi offers a broad portfolio of products to answer a wide variety of information and entertainment needs—in the vehicle, home, office, or virtually anywhere.

About XM

XM Satellite Radio is North America’s leading provider of satellite radio. XM offers up to 100 digital radio channels: commercial-free music channels ranging from hip hop to opera, rock to bluegrass, big band to reggae; talk radio channels, including news, sports, comedy, and children’s programming. Subscribers pay a low monthly fee for the XM service, which was named Best Radio Service by the music industry’s leading magazine Billboard at the 2004 Digital Entertainment Awards.

Exclusive programming on XM includes Major League Baseball® games for every team, all season long. You can listen to XM on a variety of satellite radio receivers for the vehicle, home, and portable use. XM is broadcast via satellite from coast to coast, so you can listen to XM continuously as you travel across the country.

To receive the XM service, you must subscribe to XM. Available in the continental United States and Canada only. Satellite radio reception depends on the ability of the antenna to receive a signal. The signal may not be available in buildings or if obstructed (e.g., by mountains, trees, bridges, etc).
Let’s Get Started

First, some important reminders

We know you’re eager to turn on your new RoadyXT and listen to XM. Please take a moment to remember the following:

⚠️ **Warning:** This manual contains important safety and operating information. Please read, understand, and follow the instructions in this manual. Failure to do so could result in personal injury, death, and/or damage to your RoadyXT, accessories, and/or to your vehicle or property.

⚠️ **Warning:** When using this product it is always important to keep your eyes on the road and your hands on the wheel. Not doing so could result in injury and/or death to yourself or to others and/or property damage.

**Caution:** Use your RoadyXT only with the enclosed components or approved accessories. Do not modify wires or other connectors in any way; you could cause a malfunction, which could damage your RoadyXT and will void your warranty.

**Caution:** Refrain from using food or drinks near your RoadyXT. Spilling food or drinks on the unit can damage it. Also, improperly installing the antenna cable can cause leaks, which can damage your RoadyXT and/or your vehicle.
Controls

**power**

**menu** – access advanced features and configuration options

**disp** – change what you see on the display

**pre/dir** – select between direct channel entry or up to 30 presets

**memory** – save and recall up to 20 artist names or song titles

**jump** – return to previous channel; press and hold to select one of the last six FM frequencies used for the modulator

**search** – look up channels by category or scan all channels

**up and down arrows, select** – change channels, choose menu options, TuneSelect

**numbers** – enter a channel directly or select favorite presets
Display

- **signal strength** – 1 to 3 bars
- **search by scanning all channels**
- **display modes 1-5**
- **search channels by category**
- **channel selection mode** – direct entry or preset banks A, B, or C

**additional info** – channel name, channel number, artist, song title, Stock Ticker, and Info Extras
Remote control*

- **power**
- **up and down arrows, select** – change channels, choose menu options, TuneSelect
- **search** – look up channels by category or scan all channels
- **pre/dir** – select between direct channel entry or up to 30 presets
- **display** – change what you see on the display; show artist name, song title, channel number, StockTicker, or Info Extras
- **menu** – access advanced features and configuration options
- **+ and -** – change channels, or control volume if RoadyXT is placed in an audio system
- **jump** – return to previous channel; press and hold to select one of the last six FM frequencies used for the modulator
- **numbers** – enter a channel directly or select favorite presets
- **memory** – save and recall up to 20 artist names or song titles

*Sold separately*
Activating Your RoadyXT

Use the arrow buttons to find channel 0, then push the “select” button to choose it. You should see an 8-character XM Radio ID in the display. (The XM Radio ID should also be on the bottom of your RoadyXT, and on the package.) Write the ID here:

```
  _   _   _   _   _   _   _   _   _   _
```

Note: Carefully check your XM Radio ID. The letters I, O, S, and F are not used.

Activate your XM Satellite Radio service by contacting XM at https://activate.xmradio.ca or by calling 1.877.GET.XMSR (1.877.438.9677) You will need the XM Radio ID and a major credit card.

XM will send a signal from the satellites to activate the full channel lineup. Activation normally takes 10 to 15 minutes, but during peak busy periods, you may need to keep your RoadyXT on for up to an hour to complete the activation process. When you can access the full channel lineup on your RoadyXT, you’re done!

⚠️ Warning: When using this product it is always important to keep your eyes on the road and your hands on the wheel. Not doing so could result in injury and/or death to yourself or to others and/or in property damage.

⚠️ Warning: Failure to properly follow all installation instructions may result in personal injury, death, and/or damage to your RoadyXT, accessories, and/or to your vehicle or property.
Listening to XM

Selecting channels

Select a channel directly by entering its channel number. Press the “pre/dir” button (step 1) until direct appears on the screen. Then press the number buttons (step 2) corresponding to the channel. Channel 12 can be entered as “1,” then by “2,” or as “0,” “1,” and “2.”

Or press the up and down arrows to quickly step through each channel. When you find one you like, press the “select” button.

⚠️ Warning: When using this product it is always important to keep your eyes on the road and your hands on the wheel. Not doing so could result in injury and/or death to yourself or to others and/or in property damage.
Searching for channels by category

XM channels are arranged by categories, or neighborhoods. This allows you to see all channels in the “Rock” category, for example.

Press the “**menu**” button (step 1), go to “Search Mode,” and select “By Category.”

Each press of the “**search**” button (step 2) tunes you to the first channel of a new category.

Notice that the **category** icon is highlighted in the display.

Use the arrow buttons (step 3) to sample the channels within a category. Press the “**select**” button to choose a channel.

If you do nothing for 10 seconds, the radio automatically returns to the normal channel selection method.
Searching for channels by scanning

Your RoadyXT can also scan through each channel, pausing long enough to hear the programming before moving on to the next one.

Press the “**menu**” button (step 1), go to “Search Mode,” and select “By Scanning” (step 2).

Press the “**search**” button to begin scanning (step 3). Each channel plays for about 5 seconds. While scanning channels, **scan** blinks in the display. Press the “**search**” button again to stop on a channel.
Using presets

Your RoadyXT can store up to 30 of your favorite channels as presets. The presets are organized into three banks (A, B, or C) that each contain 10 presets.

Press the “pre/dir” button one or more times to select bank A, B, or C (step 1). After you’ve tuned to your desired channel, press and hold a number button to save the channel into that preset (step 2).

Whenever you want to quickly tune to that channel, simply press that button again.

You can use the preset banks to organize your channels in different ways: Store your favorite channels in bank A, and someone else’s favorite channels in bank B. Or use one bank for music, another for news.
Memory and jump

Press the “memory” button to remember a song’s artist or title. Your RoadyXT can remember up to 20 entries. (After 20, any new entry replaces the oldest entry in memory.)

To recall the list of songs, press and hold the “memory” button, then use the up and down arrow buttons to step through the list.

Press the “jump” button to return to the previous channel you were listening to.

You can press and hold the “jump” button for FM presets. See page 16 for more information.
Personalizing Your RoadyXT

You can easily adapt your RoadyXT to suit your listening habits. Simply press the “menu” button to see the options you can customize. If you ever get lost or decide not to change anything, press the “menu” button several times to return to normal operation. Or just wait about 15 seconds and RoadyXT automatically cancels whatever you’re doing.

Making your vehicle’s FM radio an XM radio

You will first need to determine if your installation will require the use of the FM modulator or the use of the cassette adapter. If your vehicle’s radio does not have a cassette player, you will need to use either the Professional wired FM or the self install method using the XM SureConnect. Please read the XM SureConnect installation guide before installing.

Your RoadyXT contains a built-in FM modulator that transmits the XM audio signal to your vehicle’s FM radio when using the vehicle cradle only.

1. Find an FM frequency that is not being used by any commercial FM station. Tune your FM radio through the FM band and note which frequency has no FM station or the least amount of interference. (See page 17 for more information on finding an unused FM frequency.)

2. Turn on your RoadyXT.

3. Press the “menu” button and select “FM Frequency.”

4. Match the FM frequency that you found in step 1.
5. You should now hear XM programming on your vehicle’s FM radio. If the sound isn’t clear or you hear noise or static, try another FM frequency. If you’re traveling, you may need to retune periodically; this is due to the differences in signal strength of local FM stations and is not a problem with your RoadyXT.

6. Pressing and holding the “jump” button for 2 seconds pulls up a list of the last six FM frequencies you selected. This allows you to quickly tune to unused FM frequencies when using the FM modulator. Use the arrow buttons and the “select” button to choose the frequency you want.
Screen colour
To change the colour of the display, press the “menu” button and select “Screen Color.” Use the arrow and the “select” buttons to choose a colour; to cancel, press the “menu” button.

Contrast
To vary the contrast of the display, press the “menu” button and select “Contrast.” Use the arrow buttons to adjust the contrast, and press the “select” button to confirm.

Audio level
You may adjust RoadyXT’s audio output level if it is too high (causing distortion) or too low. Choose a setting so that the XM audio matches your other audio sources, such as your CD player or FM radio. To change the audio output level, press the “menu” button and select “Audio Level.” Use the arrow buttons to adjust the level and the “select” button to confirm. Press the “menu” button to exit.

Most users should NOT need to change this level from the factory setting. This is not a volume control; you should set the volume using the audio system that is connected to your RoadyXT.
Aiming the antenna

Note: For use with the Home Kit, sold separately.
Your RoadyXT can help you choose the best antenna position and orientation.

1. Press the "menu" button. Use the arrow and "select" buttons to choose "Antenna Aiming."

2. Slowly turn and tilt the antenna. The signal bars on the display will change. Find the position that gives at least two bars on either "satellite" or "terrestrial."

3. The antenna aiming screen remains as long as it’s needed to help you position the antenna. When you’ve found the best position, press the "menu" button twice to return to normal operation.

TuneSelect

TuneSelect can alert you whenever one of your favorite songs or artists is playing on any XM channel.

1. Press the "menu" button and select the "TuneSelect" option, then select "Song or Artist." You can choose to select "By Song" (factory default) or "By Artist." Press the "menu" button again to return to normal operation.

2. When you hear one of your favorite songs or artists, press and hold the "select" button until you hear a beep. This indicates that RoadyXT has saved the song or artist information to its TuneSelect list. The list holds up to 20 entries; when it is full, any new entry replaces the oldest entry in the list.

3. When any song or artist on the list is currently playing on any XM channel, your RoadyXT beeps and flashes "Artist / Song Found" on its display.

4. Press the "select" button to switch to that channel.
5. To edit the list, press the “menu” button and choose the “TuneSelect” option, then the “Erase” option. You can either erase specific songs or artists on the list, or erase all songs and artists.

**Stock Ticker**

You can track up to 20 stock symbols and see their prices and movements right on the RoadyXT’s display.*

**TO ADD A STOCK SYMBOL:**

1. Press the “menu” button, select “Stock Ticker,” and select “Add Stocks.”

2. Use the arrow buttons to add each letter of the desired stock symbol. Press the “select” button after choosing each letter. (Your RoadyXT has a list of more than 9,000 stock symbols, and will not only help you complete each entry but prevents you from entering incorrect symbols.)

3. When you’ve entered all your desired stock symbols, press the “menu” button several times (or simply wait a few seconds) until your RoadyXT returns to normal operation.

4. Press the “disp” button until you see “Stocks” and a ticker across the bottom of the screen.**

**TO ERASE A STOCK SYMBOL:**

1. Press the “menu” button, select “Stock Ticker,” and select “Erase Stocks.”

2. Choose “Erase All” or “Erase Some.”

3. If you’re erasing some stocks, press the arrow buttons to select the stock to be deleted. Press the “select” button to erase the chosen stock symbol.

4. Press the “menu” button several times to return to normal operation.

*Quotes are provided by ComStock, Inc. and cover most stocks listed on the NYSE, AMEX, or NASDAQ. Market information is delayed by approximately 25 minutes.

**Extreme cold temperatures can affect the performance of the LCD in “Scroll” mode. We recommend you change to the “Pages” mode until the temperature rises.
Info Extras

XM Satellite Radio will broadcast information such as sports scores and other features at various times.*

Press the “menu” button and select “Info Extras” (step 1). Use the arrow buttons to see what’s available (step 2).

Press the “select” button to add or remove the Info Extras item (step 3). “-” indicates that you have not yet selected the item; “+” means you’ve chosen the item.

To view the Info Extras that you chose, press the “disp” button until you see the Info Extras items at the bottom of the screen (display mode 5).

*Sports scores are provided by Stats, Inc.
Changing display information
The Stock Ticker and Info Extras can either be scrolled (moving from right to left in the display) or paged (one symbol at a time). To switch from one option to the other:
1. Press the “menu” button and select “Display Mode.”
2. Choose either “Pages” or “Scroll.” Press the “select” button to confirm.

Direct Tune
Normally as you press the arrow buttons, you can preview what’s playing on other XM channels before actually selecting a channel. To automatically tune to a channel without having to press the “select” button, set the following option:
1. Press the “menu” button.
2. Select “Direct Tune.”
3. Select “On.” To return to the factory-default method, select “Off.”

Auto-On
When you use your RoadyXT in a car or truck, it normally turns on when you switch on the vehicle’s ignition. If you prefer to manually turn on your RoadyXT using its power button, set the following option:
1. Press the “menu” button.
2. Select “Auto-On.”
3. Select “On.” To return to the factory default, select “Off.”

You should also set this option to “Off” if your RoadyXT is connected to a power source that is always live.
Auto-Off and “sleep” timer
You can set your RoadyXT to shut off the radio 1 to 3 hours after being turned on. Set this option if you have connected your RoadyXT to a power source in your vehicle that is always live. Your RoadyXT will then automatically shut off and prevent you from draining your vehicle’s battery. You can also use this feature as a “sleep” timer.

1. Press the “menu” button.
2. Select “Auto-Off.”
3. Select the desired time interval. Choose “Off” if you do not want to use the sleep timer.

Resetting to factory default
You can return your RoadyXT to the state it was shipped from the factory. Be careful: this will erase all settings, including Stock Ticker, Info Extras, presets, display options, and audio options.

1. Press the “menu” button.
2. Select “Factory Default.”
3. Select “Yes” to restore your RoadyXT to the factory settings.
Vehicle Installation

Introduction
This XM receiver offers a variety of options for connecting XM Satellite Radio to your vehicle’s FM radio. XM research and lab test results show that using a vehicle cassette adapter can maximize the relationship between the best sound quality and ease of installation. If your vehicle kit does not include a cassette adapter, one should be available at your local retailer.

</tr>
</tbody>
</table>

1. Cassette Adapter
Using a cassette adapter for audio is the most popular and best sounding solution. Please follow steps 1 through 3 on the following pages for mounting the satellite radio antenna and securing the XM receiver and cables.

2. Professional Wired FM
A wired FM installation kit is available from your retailer for professional installation. See your retailer for details. This solution is recommended if you cannot get acceptable performance with the FM modulator.

3. Self Install (XM SureConnect)
The XM receiver is equipped with an FM modulator, which can transmit the XM audio to your car’s FM radio. See the XM SureConnect Installation Guide for more information.
Installation Instructions

Step 1

First, determine the proper location for your satellite radio antenna based on the following criteria for your specific vehicle:

- You must locate the satellite radio antenna on the top of the roof either in front of the rear window (option 1) or behind the windshield (option 2). The satellite radio antenna will perform best if magnetically attached to a steel surface with an unobstructed view of the open sky and minimum of 3 to 6 inches of metal surrounding the antenna.

Step 2

- When routing the antenna cable along the windshield or rear window, tuck the antenna cable under the window seal to maintain a professional looking installation and to avoid loose wires on the exterior of the vehicle that are susceptible to damage. Follow the interior cable routing diagram depicted by dashed lines in figure 1 where possible.
- Avoid kinking, crimping, twisting, or chafing the cable. Use pre-existing wire channels when possible.
Step 3:

- Once you have plugged the power and antenna jacks into the car cradle, use the included cable organizer as shown in figure 2 to improve the overall appearance of the installation.

- Reuse the cable twist ties that were provided with the power adapter and car antenna cables and always be sure to gather, bundle, twist tie, and secure any excess cable remaining after determining the best location for your satellite radio installation.

- For example, secure the excess cable up under your dash, between the seat and the console, or on the floor under a seat or floor mat. This will help to prevent the excess cable from interfering with the everyday use of your vehicle, improve the appearance of the installation, and avoid any undesirable accidental damage to the cables that might result in loss of power or satellite signal.

- For FM modulator installations, securing and tie-wrapping the excess cable is important to reduce background hissing noise. Be sure to choose a location carefully by taking notice of how doors and trunks open and close, as well as how seats move when they are adjusted, so you can be certain ample clearance is provided for the cables.
For option 1 and rear mounting locations, route the cable into the trunk as shown. Always cross the weather seal at the lowest part of the trunk to reduce water leaks. From the trunk, route the cable into the passenger compartment through available wire channels and then along the floor under the door jamb trim or under the carpet to the front of the passenger compartment. Do not leave the cable loose in the passenger compartment where it is likely to be damaged.

For option 2 and front mounting locations, route the cable along the door jamb and into the vehicle as shown. Route the cable across the weather seal near the bottom of the door to reduce water leaks.
Other Things You Should Know

Care

You should be able to use your RoadyXT during most of your daily activities. However, you should remember:

- If your RoadyXT does get dirty, wipe the case with a soft cloth (lightly moistened with water if necessary), then wipe dry with another cloth. Avoid chemicals such as paint thinner, alcohol, or abrasive cleansers.

- It is best to keep your RoadyXT out of direct sunlight or other sources of extreme heat.

Caution: Refrain from using food or drinks near the RoadyXT. Spilling food or drinks on the unit could damage it. Also, improper antenna cable installation can cause a leak that could result in damage to your RoadyXT and/or your vehicle.

Accessories (sold separately)

We’re always developing useful and clever accessories for your RoadyXT such as a Home Kit. For additional information and to purchase accessories, please visit our web site at www.xmradio.ca or your local retailer.
Troubleshooting

Your RoadyXT should provide you with trouble-free performance without needing any servicing. If it does not appear to be working properly, first try to remedy the problem by following these steps:

1. Attach all connections firmly and securely.
2. Ensure the cigarette lighter adapter or auxiliary power socket is clean and free of corrosion.
3. Check the adapter fuse by unscrewing the ribbed end of the adapter. If required, replace with a 2-amp fuse only. If your cigarette lighter adapter does not have a removable end cap, then it is equipped with an internal-fuse that resets itself after it is left unpowdered for a period of time.

<td>You cannot tune to a channel.</td>
<td>Contact XM Satellite Radio at 1.877.GET.XMSR (1.877.438.9677). Verify that you are authorized to receive that channel as part of your XM subscription, and that you have not asked XM Satellite Radio to block that channel.</td>
</tr>
<tr>
<td>No song title or artist name displayed.</td>
<td>Nothing is wrong with your RoadyXT. That information may be in the process of being updated. On some sports and news channels, there is no title or artist information.</td>
</tr>
<tr>
<td>No audio when listening through your vehicle’s FM radio.</td>
<td>Make sure that the vehicle’s FM radio and your RoadyXT are set to the same frequency (see page 16).</td>
</tr>
</tbody>
</table>
### If this happens:  
Audio has static while listening through an FM radio.

### You should:  
Change to another FM frequency (see pages 16 and 17). If the problem persists and you are using the FM modulator in a vehicle, use the Delphi FM Direct Adapter (model SA10112, sold separately).

### If this happens:  
Audio on XM instant traffic and weather channels sounds different from other XM channels.

### You should:  
Nothing is wrong with your RoadyXT. These channels use a different audio technology than the other XM channels.
Contacting Technical Support

Warranty

Delphi limited consumer warranty

Delphi Product and Service Solutions (“Delphi”) warrants all XM Satellite Radio Products sold by Delphi (each “Product”) to be free of defects in material and workmanship, subject to the following conditions:

The duration of Delphi’s warranty with respect to each Product is limited to one (1) year from the date of sale to the original consumer purchaser.

No other express warranties are made with respect to any Product. All implied warranties, including warranties of merchantability and fitness for a particular purpose are limited to the warranty period set forth above. This warranty is not transferable and applies only to the original consumer purchaser of the Product.

Delphi will, as its sole obligation under this warranty, replace or repair, at its option, any Product that does not conform to this warranty. Products may be repaired or replaced with new or with refurbished items. This limited warranty does not cover defects in appearance, cosmetic or decorative items, including any non-operative parts. Under no circumstances will Delphi be liable for any incidental or consequential damages under this warranty or any implied warranties. These remedies are the customer’s exclusive remedies for breach of warranty. This limited warranty only extends to customers who purchase the Products in Canada.

Delphi will not be responsible for damage resulting from any (i) deviation of Delphi’s operating instructions as printed in Delphi’s catalog or on any packaging, labels or other literature provided with a Product, (ii) installation of a Product in a manner which is inconsistent with Delphi’s written instructions,
(iii) alteration or modification of a Product, (iv) misuse, (v) neglect, (vi) abuse, 
(vii) accident, (viii) normal wear and tear, (ix) commercial use, (x) improper 
storage, (xi) environmental conditions, including excessive temperature or 
humidity, (xii) service by anyone other than a Delphi authorized repair facility, 
(xiii) other improper application, installation or operation of this Product, or 
(xiv) defects or malfunctions of which Delphi is not advised within ten (10) days 
of the expiration of the limited warranty period.
How you (the Customer) can get service

To obtain warranty service during the first thirty (30) days after the date of purchase, you must return the defective Product with the original receipt to the original place of purchase. To obtain warranty service for all Products for the remainder of the limited warranty period, you must contact Delphi by phone at 1.877.GO.DELPHI (1.877.463.3574). If further clarification or additional information is required from Delphi, you may call Delphi at 1.877.GO.DELPHI (1.877.463.3574).

If warranty service is needed at any time during the warranty period, the purchaser will be required to furnish a sales receipt/proof of purchase indicating the date of purchase, amount paid, and place of purchase. Customers who fail to provide such proof of purchase will be charged for the repair or replacement of any Product.

How provincial law relates to the warranty

Some provinces do not allow limitations on the duration of implied conditions or warranties, or the exclusion or the limitation of Economic Loss. So the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights. You may also have other rights that may vary from province to province.
Step 3: If nothing happens, the display is blank.

To remedy the problem by following these steps:

1. Pressing and holding the “jump” button for 2 seconds pulls up a list of the preset numbers.
2. Select “Factory Default.”

You can also use this feature as a “sleep” timer.

Step 4: If the display still shows “Antenna Not Connected,” the antenna cradle, home or car antenna is not plugged in. The XM signal is being blocked.

• Check that your XM antenna is securely connected to your RoadyXT.
• Check the antenna in a different location.
• Replace your XM antenna if necessary.
• If you have your XM antenna already connected, temporarily disconnect it and then reconnect it to see if the problem is solved.

Step 5: If the display still shows “Antenna Not Connected,” it’s possible that the XM audio isn’t being played back properly. The display is blank; nothing happens when you press the arrow buttons.

To remedy the problem by following these steps:

1. Press “Volume” button (step 1) until “Volume” appears on the screen. Then press “Up” or “Down” button.

Step 6: If the display still shows “Antenna Not Connected,” the XM audio can’t be played back properly. The display is blank; nothing happens when you press the arrow buttons.

To remedy the problem by following these steps:

1. Press “Volume” button (step 1) until “Volume” appears on the screen. Then press “Up” or “Down” button.

Step 7: If the display still shows “Antenna Not Connected,” the XM audio isn’t playing properly. The display is blank; nothing happens when you press the arrow buttons.

To remedy the problem by following these steps:

1. Press “Volume” button (step 1) until “Volume” appears on the screen. Then press “Up” or “Down” button.

If you continue to experience problems, please contact Delphi Technical Support at 1-877-GO-DELPHI (1-877-463-5734) or Delphi Product and Service Solutions on the Web at www.delphiusa.com.

to recall the list of songs, press and hold the " button.

To receive the XM service, you must subscribe to XM. Available in the continental United States and Canada.

XM Satellite Radio is North America's leading provider of satellite radio. XM continues its strong tradition of innovation in the audio industry. Now you can listen to your favorite music, artists, and talk shows, as well as channels from the world of sports, news, and information. XM is also the official broadcaster of NASCAR. XM Satellite Radio is committed to offering a wide variety of content that will give you something to enjoy.

Activate your XM Satellite Radio service by contacting XM at 1-800-XM-SATELLITE (1-800-967-2835) or visiting www.xmradio.com.

Introduction

Listening to XM

To change the audio source:

For XM:

1. Press the "menu" button, select "Source," and select "XM Satellite Radio" or "Terrestrial Radio.

For terrestrial radio:

1. Press and hold the "scan" button.

Searching for channels

Selecting channels

To select a channel:

1. Press and hold the "select" button until you hear a beep. This indicates that RoadyXT has selected that channel.

You may select a channel directly or select favorite presets.

By category

up to 20 artist names or memory

Show artist name, song

– look up channels

– access advanced

Select

menu

Fuse that resets itself after it is left unpowered for a period of time.

Personalizing Your RoadyXT

Step 3:

1. Press the "menu" button, select "Factory Default," and select "Erase Stocks." TO ERASE A STOCK SYMBOL:

(a) Select the stock symbol

(b) Press the "select" button until you hear a beep. This indicates that you have erased the stock symbol.

(c) Repeat the above steps for each stock symbol you wish to erase.

Resetting to factory default

Step 5:

1. You should now hear XM programming on your vehicle's FM radio. If the problem persists

2. Recheck your power connection.

3. If there is no programming on your XM Satellite Radio, please contact XM at 1-800-XM-SATELLITE (1-800-967-2835) or visit www.xmradio.com.

4. If there is no programming on your XM Satellite Radio, please contact XM at 1-800-XM-SATELLITE (1-800-967-2835) or visit www.xmradio.com.

5. You may have tried to tune to a channel that is not available in your area.

Other Things You Should Know

1. If you cannot get acceptable performance with the FM modulator, you may need to adjust the orientation.

2. For example, secure the excess cable up under a seat or floor mat. This will help to prevent the excess cable from tangling or interfering with the operation of your vehicle.

3. When using this product it is always best to use it in conjunction with a cradle. The cradle protects the product from damage during transportation and also provides additional support.

4. If you experience problems with the product, please contact Delphi at 1-800-222-7301. We will work to resolve the issue as quickly as possible.

5. For additional information in solving problems with your RoadyXT, please refer to the service manual or contact Delphi at 1-800-222-7301.

Personalizing Your RoadyXT

Let's Get Started

To recall the list of songs, press and hold the " jump " button for 2 seconds. You can use the preset banks to organize your channels in different ways: – access advanced options, – change channels, or – enter a channel directly or select favorite presets. Aiming the antenna...
Let's Get Started

You should also set this option to "Off" if your RoadyXT is connected to a channel without having to press the "button, set the following option:

3. Select "On." To return to the factory-default method, select "Off."

You can press and hold the " button to return to the previous channel you were listening to.

Some provinces do not allow limitations on the duration of implied conditions. How provincial law relates to the warranty depends on the specific province.

Customers who fail to provide such proof of purchase will be charged for the warranty. If warranty service is needed at any time during the warranty period, the information is required from Delphi, you may call Delphi at 1.877.GO.DELPHI or Delphi's website.
Let's Get Started

1. Press the "menu" button and select the "TuneSelect" option, then select "Category." 

2. Select "Auto-On." When you use your RoadyXT in a car or truck, it normally turns on when you start your vehicle. Choose either "Pages" or "Scroll." Press the "menu" button to confirm. Press the "menu" button to select "Scroll," then press the "menu" button to select "Scroll."

Troubleshooting

Cause: When using home stand or vehicle plug, you cannot receive XM services. Possible problem with XM antenna.

You can press and hold the "menu" button to select "Scroll," then press the "menu" button to select "Scroll." If you do not receive XM services, make sure the home or car antenna is plugged into the home stand or vehicle plug. Make sure the home or car antenna is connected to your RoadyXT.

5. TuneSelect

TuneSelect allows you to customize your XM service. You can set your RoadyXT to shut off the radio 1 to 3 hours after being turned on. You can also set your RoadyXT to turn on after a scheduled time. You can set your RoadyXT to receive XM services in a specific location. You can also set your RoadyXT to receive XM services in a specific time range.
