Start Here

1 Insert the Radio Dock Adapter into the Dock
You’ll need to insert the Radio Dock Adapter that is compatible with your Radio into the Home Dock.
A. Locate the Radio Dock Adapter that is compatible with your Radio.
If you have an XM Radio: If your Radio is branded as XM*, select the Radio Dock Adapter marked XM & SIRIUSXM on the back of the adapter. Compatible radios include Edge, Onyx, Onyx EZ, Onyx Plus, Xpress RCi, XpressRc and Xpress. If you have a Sirius Radio: If your Radio is branded as Sirius*, select the Radio Dock Adapter that is marked SIRIUS B. Orient and place the Radio Dock Adapter that you selected into the Home Dock. Be sure the adapter is centered, and is seated all the way down into the dock.
C. Once the adapter is seated correctly in the Home Dock, gently press the top of the adapter against the dock with your finger until it clicks into place. The Radio Dock Adapter is now installed.

2 Connect the Home Dock and Dock the Radio
Select a location in close proximity to your stereo system or powered speakers, and also where the cable from the Indoor/Outdoor Home Antenna can reach the Home Dock. The location should be easily accessible and provide good visibility of the display, but should not be located where it will be in direct sunlight, which will reduce the visibility of the display screen.
A. Connect the Indoor/Outdoor Home Antenna to the silver ANT connector at the rear of the Home Dock.
B. Connect the Home Power Adapter to the red PWR connector at the rear of the Home Dock, and plug it into a wall outlet.
C. Place your Radio in the Home Dock.
D. Power on your Radio by pressing the Power button.
NOTE: Your Radio may be a different model than the Radio shown here.

3 Place & Aim the Indoor/Outdoor Home Antenna
A. Check the signal strength indicator on the Radio’s screen. If there are 2 or 3 vertical bars of signal strength, continue with step 8. If not, continue with step 2B below.
B. Refer to your Radio’s User Guide (go to siriusxm.ca/ userguides) for instructions on accessing the Signal Indicator. Signal, or Antenna Aiming screen of your Radio, to see a visual indication of signal strength.
C. Try experimenting with the Indoor/Outdoor Home Antenna to get a feel for the reception in your location. If either the Satellite or the Terrestrial signal bar (or both) are more than half filled, you are receiving a good signal and are done aiming the antenna. Exit the Signal Indicator. Signal, or Antenna Aiming screen and continue with step 4.
D. If you are not yet receiving a good signal, move the antenna around the room, or from room to room. Aim it at different windows, try moving the antenna closer to a window, ideally on the east, west, north, or south, or facing due south. Not sure which way is south? Think about where the sun rises and sets (in the west), then stand so that east is to your left and you'll be facing south. Is there a window in the direction you’re facing? Place the antenna on the windowsill/making sure it faces the glass and not the window frame. If you are receiving a good signal, you’re done aiming the antenna. Exit the Signal Indicator. Signal, or Antenna Aiming screen and continue with step 4.
E. If you were unable to find an indoor location for the antenna, you will need to place it outdoors. Refer to the Universal Home Kit User Guide 50DN23C for outdoor location options. Go to siriusxm.ca/userguides for the User Guide.

4 Connect the Audio
The Home Dock can be connected to your stereo system, or to a set of powered speakers.

To Connect the Home Dock to Your Stereo System:
A. Take the provided Stereo Audio Cable and connect the single connector to the green AUDIO connector at the rear of the Home Dock.
B. Connect the white left and red right Stereo Audio Cable connectors to any available inputs on your stereo system (if your stereo inputs are red and black, connect the white plug to the black input.)
C. Turn on your stereo system. On, and make sure you select the correct input on your stereo system for the Aux In or Line In connection.
D. If you have connected everything correctly, and you are receiving signal, you should hear the SiriusXM audio.
E. The audio level of your Radio can also be adjusted, if necessary. Refer to your Radio’s User Guide (go to siriusxm.ca/userguides) for instructions on how to adjust the audio level.

To Connect the Home Dock to Your Powered Speakers:
A. Connect the powered speakers to the green AUDIO connector at the rear of the Home Dock.
B. Plug the powered speakers into a wall outlet.
C. Turn on the powered speakers.
D. If you have connected everything correctly, and you are receiving signal, you should hear the SiriusXM audio.
E. The audio level of your Radio can also be adjusted, if necessary. Refer to your Radio’s User Guide (go to siriusxm.ca/userguides) for instructions on how to adjust the audio level.

Universal Home Kit Instructions

To adjust your Radio’s audio levels:
A. Press menu to exit.
B. Press t-mix to access the main menu.
C. Press t-scn to access the settings menu.
D. Press s-txc to select the SiriusXM screen.
E. Press v-mute to mute.
F. Press v-volume to adjust the volume.
G. Press v-s-b to adjust the subwoofer volume.
H. Press v-s-t to adjust the surround sound.
I. Press v-audio to access the audio settings.
J. Press v-bass to adjust the bass.
K. Press v-treble to adjust the treble.
L. Press v-balance to adjust the balance.
M. Press v-fader to adjust the fader.
N. Press v-cross over to adjust the crossover.
O. Press v-menu to exit.

Antenna Aiming

A. The antenna should be placed in a location where it can receive signal from the satellite dish. The antenna should be at least 20 feet away from the house and should be pointed towards the south.
B. If you are not receiving a good signal, move the antenna around the room, or from room to room. Aim it at different windows, try moving the antenna closer to a window, ideally on the east, west, north, or south, or facing due south.
C. Not sure which way is south? Think about where the sun rises and sets (in the west), then stand so that east is to your left and you'll be facing south. Is there a window in the direction you’re facing? Place the antenna on the windowsill/making sure it faces the glass and not the window frame. If you are receiving a good signal, you’re done aiming the antenna.
D. If you were unable to find an indoor location for the antenna, you will need to place it outdoors. Refer to the Universal Home Kit User Guide 50DN23C for outdoor location options. Go to siriusxm.ca/userguides for the User Guide.

This device is for apparatus compliance with Canadian CAN-003. The Class B digital apparatus complies with Canadian ICES-003. This device meets the limits for Class B digital apparatus, pursuant to part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. For product available in the Canada market, only channel 11 can be operated. Selection of other channels is not possible. This device and its antenna(s) must not be co-located or operated in conjunction with any other antenna or transmitter. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) does not exceed the spurious辐射 exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Specifications

System
Power Requirements: 100 V AC, 200 mA (max)
Operating Temperature: -4°F to +140°F (-20°C to +60°C)
Audio Output: 10 V AC, 200 mA (max)
Home Dock
Dimensions: 4.1 in (W) x 1.8 in (H) x 1.7 in (D)
Weight (without adapter): 1.8 oz (50 g)
Audio Connector: 1/8 in (3.5 mm) female
Antenna Connector: SMB male
Home Power Adapter
Input: 100-240 V AC, 50-60 Hz, 0.2 A
Output: 5.0 V DC, 1.0 A
Indoor/Outdoor Home Antenna
Type: SiriusXM Indoor/Outdoor
Cable Length: Approximately 20 ft (6.1 m)
Stereo Audio Cable
Connectors: 1/8 in (3.5 mm) stereo male to RCA left & right
Cable Length: Approximately 5.9 ft (180 cm)

Self installation instructions and tips are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills and physical ability required to properly perform an installation. SiriusXM shall have no liability for damage or injury resulting from the installation or use of any SiriusXM or third party products. SiriusXM product warranties do not cover the installation, removal or reinstallation of any product.
