Compatibility

This Universal Home Kit is compatible with the following Dock & Play Radios:

SiriusXM:
- Onyx Plus
- Edge

XM:
- Onyx
- Onyx EZ
- XpressRCi
- XpressRC
- XpressR

Sirius:
- Sportster 5
- Starmate 8, 5, 4, 3
- Stratus 7, 6, 5
- Stratus
Thank you for purchasing the SiriusXM Universal Home Kit!

The Home Kit lets you play your compatible XM or SiriusXM Dock & Play Radio through your home stereo system or powered speakers.

• There is no need for a second subscription. Just connect this Home Kit to a stereo system or set of powered speakers - and then simply move your Radio from any location to your home or office.

• This Home Kit works with a set of powered speakers or any stereo system with audio input jacks.

And for the latest information about this and other SiriusXM products and accessories, visit siriusxm.ca or your favorite retailer.

Please read the entire User Guide before installing your Universal Home Kit!
Safety and Care Information

**IMPORTANT!** Self installation instructions and tips are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills, and physical ability required to properly perform an installation. SiriusXM shall have no liability for damage or injury resulting from the installation or use of any SiriusXM or third party products. SiriusXM product warranties do not cover the installation, removal or reinstallation of any product.

- Do not expose to extreme temperatures (above 140°F or below -4°F, or above 60°C or below -20°C).
- Do not expose to moisture. Do not use device near or in water. Do not touch the device with wet hands.
- Do not let any foreign matter spill into device.
- Do not store in dusty areas.
- Do not expose to chemicals such as benzene and thinners. Do not use liquid or aerosol cleaners. Clean with a soft damp cloth only.
- Do not expose to direct sunlight for a prolonged period of time, and do not expose to fire, flame, or other heat sources.
- Do not try to disassemble and/or repair the device yourself.
- Do not drop your device or subject it to severe impact.
- Do not place heavy objects on device.
- Do not subject device to excessive pressure.

**WARNING!**

- Opening the case may result in electric shock.
- Make sure that you insert the Home Power Adapter’s plug all the way into the outlet.
- This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
Introduction

What's in the Box?

- Home Dock
- XM & SiriusXM Radio Dock Adapter
- Sirius Radio Dock Adapter
- Indoor/Outdoor Home Antenna
- Home Power Adapter
- Stereo Audio Cable
Introduction

Home Dock Color-Coded Connections

The color-coded Home Dock makes it simple to connect the cables to the appropriate connectors at the rear of the dock.

Rear View

AUDIO (Green) Connection for stereo system or powered speakers.

ANT (Silver) Connection for the Indoor/Outdoor Home Antenna.

POWER (Red) Connection for Home Power Adapter.
Home Installation

There are several steps to setting up your Home Kit. Follow these steps for an easy installation.

**Step 1: Insert the Radio Dock Adapter Into the Dock**

You’ll need to insert the Radio Dock Adapter that is compatible with your Radio into the Home Dock.

1. Locate the Radio Dock Adapter that is compatible with your Radio.

   **If you have an XM or SiriusXM Radio:** If your Radio is branded as XM* or SiriusXM*, select the Radio Dock Adapter marked XM & SIRIUSXM on the back of the adapter.

   ![XM & SIRIUSXM Adapter](image)

   **Back View**

   **Front View Correct Orientation**

   **If you have a Sirius Radio:** If your Radio is branded as Sirius*, select the Radio Dock Adapter that is marked SIRIUS on the back of the adapter.

   ![SIRIUS Adapter](image)

   **Back View**

   **Front View Correct Orientation**

2. Orient and place the Radio Dock Adapter that you selected into the Home Dock.

   *If you are unsure whether your Radio is an XM, SiriusXM, or Sirius Radio, check the label on the back of the Radio. If the label on your Radio says XM Radio ID or Radio ID, and has an 8-digit alphanumeric number, it is an XM or SiriusXM Radio. If the label on your Radio says Sirius ID, SID, or ESN, and has a 12-digit numeric number, it is a Sirius Radio.*
Dock. Be sure the adapter is centered, and is seated all the way down into the dock.

3. Once the adapter is seated correctly in the Home Dock, gently press the top of the adapter against the dock with your finger until it clicks into place. The Radio Dock Adapter is now installed.
Home Installation

Should it become necessary to remove the Radio Dock Adapter from the Home Dock, use your fingernail to gently press down on the top of the adapter, and then use a long thin object such as a paper clip, a screw driver or something similar to pry the adapter away until it releases from the dock. Then lift the adapter up and out of the dock.
Step 2: Connect the Home Dock and Dock the Radio

When installing the Home Dock in your home, choose a location in close proximity to your stereo system or powered speakers, and also where the cable from the Indoor/Outdoor Home Antenna can reach the Home Dock. The location should be easily accessible and provide good visibility of the display, but should not be located where it will be in direct sunlight, which will affect the visibility of the display screen.

A. Connect the Indoor/Outdoor Home Antenna

Once you have selected a location for the dock, connect the antenna to the silver ANT connector at the rear of the Home Dock.

We will work on the location and aiming of the antenna in the next step.
B. Connect the Home Power Adapter

Connect the Home Power Adapter to the red Power connector at the rear of the Home Dock, and plug it into a wall outlet.

C. Dock Your Radio

Insert your Radio into the Home Dock as shown, and turn the Radio On by pressing the Power button.

NOTE: Your Radio may be a different model than the Radio shown here.
Step 3: Place and Aim the Indoor/Outdoor Home Antenna

To begin, try experimenting with the Indoor/Outdoor Home Antenna to get a feel for the reception in your location. In major metropolitan areas, you might find that you get great reception in several locations without worrying too much about aim and placement. If 2 or 3 vertical bars of signal strength are being displayed, continue with step 4 on page 17.

If there is not at least two bars of signal strength displayed, refer to your Radio’s User Guide (go to siriusxm.ca/userguides) for instructions on accessing the Signal Indicator, Signal, or Antenna Aiming screen of your Radio, to see a visual indication of signal strength. Move the antenna around the room or from room to room. Aim it from different windows. If you find a location where you are receiving good Satellite or Terrestrial signal strength (or both), exit the Signal Indicator, Signal, or Antenna Aiming screen. Continue with step 4 on page 17.

If you are unable to find a location where you are receiving good Satellite or Terrestrial signal strength, try some of the suggestions which follow.

*The screens shown above are representative and may differ from the screens displayed on your Radio.*
Other Indoor/Outdoor Home Antenna Installation Suggestions

Try moving the Indoor/Outdoor Home Antenna closer to a window, ideally one that is facing due south.

Not sure which way is south? Think about where the sun rises (in the east) and sets (in the west). Then stand so that east is to your left and you’ll be facing south. Is there a window in the direction you’re facing? Move the antenna closer to the window.

**TIP!** Still not sure which way is south or where to place your Indoor/Outdoor Home Antenna? Look up your location on an online mapping website that offers satellite views of street addresses where you can easily see which way is south, and what window may offer an unobstructed view of the sky.

Another easy method is to start at any window, then work from window to window in a simple pattern to find the window that gives the best signal strength. Note that the antenna must also have an unobstructed view, with no trees or buildings blocking its aim. If the antenna is aimed through a window, be aware that blinds, screens, or any other non-glass elements such as thermal insulation can sometimes cause reception issues. If this is the case, you may want to use another window or place the antenna outside of the window.

If you find a window that gives you good signal strength, you can place the antenna on the windowsill. The antenna may need to be placed on something to raise it above the level of the window frame.

If you don’t have a window where you receive a consistent signal, or placing the antenna in a window is not a practical solution for you, **BETTER**
reception can be achieved by placing the antenna outside on a window ledge, porch, table, or patio. The location you choose should provide the antenna with a clear view of the southern sky.

If none of the previous solutions work for you, then the **BEST** reception can be achieved by mounting the antenna outdoors, with a clear view of the southern sky.

Note that you will want to consider any potential hazards when you choose the mounting location, and possibly consider professional installation. Sirius XM Canada Inc. is not liable for any damages.

To mount the antenna, you will need four screws (not included) with a 1/4” head (e.g., an M3 screw), and that are suitable for the material onto which you are affixing the antenna, (e.g., wood, metal, etc.). The screws should be spaced 1-3/8” apart horizontally and 1-1/8” vertically. Refer to the template on “Indoor/Outdoor Home Antenna Template” on page 27.

Once you have found a suitable location for the antenna, route the antenna cable to the Home Dock. Be sure you avoid any obstructions that could crimp, kink, or twist the cable. Use protective grommets
wherever rough openings are encountered. If the antenna is installed outdoors, route the cable from the antenna location to the interior of the home, working the cable through the basement, under a window sill, etc., and make adjustments to take up cable slack as necessary.

**TIP!** If your Indoor/Outdoor Home Antenna’s cable isn’t long enough, visit [www.siriusxm.ca](http://www.siriusxm.ca), or your favorite retailer, and consider a 50 ft. Home Antenna Extension Cable or a Wireless Home Signal Repeater.

Verify that the antenna is pointed south, and that the antenna’s view of the sky is not blocked by a tree, a building, a bridge, or anything else. Try various locations until you find one where you are receiving a good signal.

The Indoor/Outdoor Home Antenna’s reception can also be tweaked by opening or closing the antenna clamshell, and turning the antenna. While observing the signal strength, make small adjustments to the angle of tilt of the clamshell until the highest possible signal strength is achieved. If you have not wall-mounted the antenna, turn the antenna slightly to the right or left and observe if the signal strength increases. For each tweak, allow a few seconds in each position to determine if the signal strength increases.
Step 4: Connect the Home Dock to a Stereo System or Powered Speakers

The Home Dock can be connected to your stereo system, or to a set of powered speakers. If you are connecting to a stereo system, see the following section. If you are connecting to a set of powered speakers, see “To Connect the Home Dock to Your Powered Speakers” on page 19.

To Connect the Home Dock to Your Stereo System

The Home Dock can be connected to your stereo system through the Aux In or Line In connection of your stereo system, using the provided Stereo Audio Cable.

1. Take the provided Stereo Audio Cable and connect the single 1/8” (3.5 mm) connector to the green AUDIO connector at the rear of the Home Dock.

2. Connect the white left and red right Stereo Audio Cable connectors (“L” and “R” are also on each respective tip) to any available input other than PHONO on your stereo system. (If your stereo’s inputs are marked red and black,
simply connect the white plug to the black input.)

3. Turn the stereo system On, and make sure you select the correct input on your stereo system for the **Aux In** or **Line In** connection.

4. If you have connected everything correctly, and you are receiving signal, you should hear the SiriusXM audio.

5. The audio level of your Radio can also be adjusted, if necessary. Refer to your Radio’s User Guide (go to siriusxm.ca/userguides) for instructions on how to adjust the audio level. The installation is complete.
To Connect the Home Dock to Your Powered Speakers

The Home Dock can be connected directly to a set of powered speakers.

1. Connect the 1/8” (3.5 mm) connector from the powered speakers to the green AUDIO connector at the rear of the Home Dock.

2. Plug the powered speakers into an AC outlet.

3. Turn On the powered speakers.

4. If you have connected everything correctly, and you are receiving signal, you should hear the SiriusXM audio.

5. The audio level of your Radio can also be adjusted, if necessary. Refer to your Radio’s User Guide (go to siriusxm.ca/userguides) for instructions on how to adjust the audio level. The installation is complete.
Your Home Kit has been designed and built to be trouble-free, but if you experience a problem, try this:

- Check that all connections are firm and secure.
- Make sure you have connected the Home Dock as described in this User Guide. Verify that the AC power outlet is working.

<th>If you see this on the screen:</th>
<th>Try this:</th>
</tr>
</thead>
</table>
| No Signal or No Satellite Signal or Acquiring Signal | - Move the antenna to a south-facing window. Not sure which way is south? Think about where the sun rises (in the east) and sets (in the west). Then stand so that east is to your left and you’ll be facing south. Is there a window in the direction you’re facing?  
- You may need to find a better location for the antenna. Refer to “Step 3: Place and Aim the Indoor/Outdoor Home Antenna” on page 13. |
| Check Antenna Connection or Check Antenna or Antenna | - Make sure that the Indoor/Outdoor Home Antenna cable is firmly and securely plugged into the Home Dock. Make sure the cable is not bent or broken.  
- Turn the Radio off, then on, to reset this message.  
- If the message persists, most likely the Indoor/Outdoor Home Antenna cable has been damaged. Replace the antenna. |
| Channel Off Air or Channel Unavailable | - The channel you’ve selected is not currently broadcasting. Tune to another channel. |
| Loading | - Your Radio is acquiring audio or program information. This message usually goes away in a few seconds. |

# Product Specifications

## System
- **Power Requirements:** 110 V AC, 200 mA (max)
- **Operating Temperature:** -4°F to +140°F (-20°C to +60°C)
- **Audio Output:** 1.5 Vrms (max)

## Home Dock
- **Dimensions:** 4.1 in (W) X 1.8 in (H) X 1.7 in (D)
  105 mm (W) X 45 mm (H) X 44 mm (D)
- **Weight (without adapter):** 1.8 oz (50 g)
- **Weight (with adapter):** 1.9 oz (54 g)
- **Audio Connector:** 1/8 in (3.5 mm) female
- **Antenna Connector:** SMB male

## Home Power Adapter
- **Input:** 100-240 V AC, 50-60 Hz, 0.2 A
- **Output:** 5.0 V DC, 1.0 A

## Indoor/Outdoor Home Antenna
- **Type:** SiriusXM Indoor/Outdoor
- **Connector:** SMB female
- **Cable Length:** Approximately 20 ft (6.1 m)

## Stereo Audio Cable
- **Connectors:** 1/8 in (3.5 mm) stereo male to RCA left & right
- **Cable Length:** Approximately 5.9 ft (180 cm)

It is prohibited to, and you agree that you will not, copy, decompile, disassemble, reverse engineer, hack, manipulate, or otherwise access and/or make available any technology incorporated in this product. The music, talk, news, entertainment, data, and other content on the Services are protected by copyright and other intellectual property laws and all ownership rights remain with the respective content and data service providers. You are prohibited from any export of the content and/or data (or derivative thereof) except in compliance with applicable export laws, rules and regulations. The user of this or any other software contained in a SiriusXM Radio is explicitly prohibited from attempting to copy, decompile, reverse engineer, hack, manipulate or disassemble the object code, or in any other way convert the object code into human-readable form.

Environmental Information

Follow local guidelines for waste disposal when discarding packaging and electronic appliances.
IC Statement

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. For product available in the Canada market, only channel 1~11 can be operated. Selection of other channels is not possible. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p) is not more than that permitted for successful communication. IC Radiation Exposure Statement: This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

WARNING! The FCC and FAA have not certified this Satellite Radio Receiver for use in any aircraft (neither portable nor permanent installation). Therefore, SiriusXM cannot support this type of application or installation.
