Thank you for purchasing the SXV200V1C SiriusXM Connect Vehicle Tuner Kit. The SXV200V1C kit includes the following:

This kit comes with everything you need to add Satellite Radio to your vehicle's headunit. Check your headunit for compatibility. If your headunit has the official SiriusXM-Ready logo it is compatible with the SXV200C Vehicle Tuner. Products with these logos are not compatible.

Thank you for purchasing the SXV200V1C SiriusXM Connect Vehicle Tuner Kit.

### Install the Magnetic Mount Antenna

Before installing the Magnetic Mount Antenna, check yourself. More detailed installation instructions and illustrations can be found at www.siriusxm.ca/help. You’ll need to access the back of the SiriusXM-Ready headunit so you can connect the SXV200C. The headunit may have a panel mount type SXV200C Vehicle Tuner. Locate the SiriusXM connector on the headunit and be sure to turn OFF the SiriusXM-Ready headunit before connecting the SXV200C. Thread the thin wire through the molded brackets on the underside of the headunit and connect the SXV200C Vehicle Tuner as shown. Then secure it to a bracket or wiring harness using the wire ties. Avoid brackets with sharp edges and any moving parts such as gas and brake pedals.

### Select the Best Location for the Magnetic Mount Antenna

Proper placement of the Magnetic Mount Antenna is very important. Consult a professional installer to find an alternate location if you are uncomfortable with the antenna location. Avoid placing the antenna near obstacles that can weaken the signal, and always faces the sky. Avoid crossing the antenna cable under the dashboard. If you are installing the antenna at the edge of the roof or hood, install the Antenna Cable Routing Adapter to direct the cable under the dashboard. Then route the cable along trunk and secure excess cable under the trunk lid, on the front hood, or on top of the front fender. For a convertible, recommended mounting location is above the front windshield, or alternately on the roof rack or rear window. For a sedan or coupe, recommended mounting location is above the rear window or front windshield. For a pickup or SUV, recommended mounting location is above the rear window or front windshield. If the cable gets caught in the windshield wiper, we recommend installing the antenna above the front windshield. 

Avoid placing the antenna near obstacles that can weaken the signal. Connect the SXV200C behind the headunit location or fender. Make sure your vehicle headunit is turned on and that Satellite Radio is selected. Verify that you are receiving the SiriusXM signal so that you can hear the SiriusXM audio.

### Make a Note of Your Radio ID

Make a note of your Radio ID. You can find it on channel 0, on a label on the bottom of your headunit, or printed on the inside top of the packaging, and on the label on the bottom of your SXV200 Vehicle Tuner. You can subscribe to the SiriusXM service anytime by following these steps:

1. You'll need to access the back of the SiriusXM-Ready headunit so you can connect the SXV200C. The headunit may have a panel mount type SXV200C Vehicle Tuner. Locate the SiriusXM connector on the headunit and be sure to turn OFF the SiriusXM-Ready headunit before connecting the SXV200C. Thread the thin wire through the molded brackets on the underside of the headunit and connect the SXV200C Vehicle Tuner as shown. Then secure it to a bracket or wiring harness using the wire ties. Avoid brackets with sharp edges and any moving parts such as gas and brake pedals.

2. Activate your service:
   - By phone: Call 1-877-438-9677
   - Online: Go to www.siriusxm.ca and then: SUBSCRIPTION
   - Activate usually takes 10 to 15 minutes, but may take up to an hour. Make sure your vehicle headunit is turned on and that Satellite Radio is selected. Verify that you are receiving the SiriusXM signal so that you can hear the SiriusXM audio.
   - Make a note of your Radio ID. You can find it on channel 0, on a label on the bottom of your headunit, or printed on the inside top of the packaging, and on the label on the bottom of your SXV200 Vehicle Tuner. You can subscribe to the SiriusXM service anytime by following these steps:

3. Make sure your vehicle headunit is turned on and that Satellite Radio is selected. Verify that you are receiving the SiriusXM signal so that you can hear the SiriusXM audio.

4. If you are unable to locate the SiriusXM-Ready headunit, consult your headunit User Guide. This kit comes with everything you need to add Satellite Radio to your vehicle's headunit. Check your headunit for compatibility. If your headunit has the official SiriusXM-Ready logo it is compatible with the SXV200C Vehicle Tuner. Products with these logos are not compatible.

### Secure the Tuner

Secure the SXV200C Vehicle Tuner behind the vehicle headunit location or fender. If you are uncomfortable with installing the antenna, consult a professional installer. Proper placement of the Magnetic Mount Antenna is very important. Consult a professional installer to find an alternate location if you are uncomfortable with the antenna location.
## Troubleshooting

The troubleshooting information below is for general reference. Your SiriusXM Satellite Radio receiver may display slightly different messages. The troubleshooting information listed below is for general reference.

### If you see this on the headunit and make sure it is plugged all the way in.

- Check the antenna connection to make sure it is fully connected. The antenna is not included in this package. See your dealer for more information on setting up your antenna.
- Replace the antenna.
- Try this:
  - Turn the headunit off, then on, to reset this message.
  - Make sure that the Magnetic Mount Antenna cable is firmly connected.
  - Be sure that your headunit is correctly wired to the antenna.
